ACADEMIC PROJECTS, THESIS AND OJT

Java Software Development

November 2023 - December 2023

Rent A Sport – Java & SQL Rental Management System

- Developed a billiards rental management system with timer tracking, receipt generation, inventory management, and automated notifications using Java and SQL.

Numerical Methods Calculator – Data Structures & Algorithms Project

- Collaborated in developing a Java-based calculator implementing Bisection Method, Gaussian Elimination, Newton-Raphson, and other numerical algorithms for mathematical problem solving.

Web Development

May 2025 - July 2025

BuISU ARICC Inventory System (June - July 2025)

- Developed and contributed to a Laravel-based Inventory Management System utilizing XAMPP (MySQL) for backend database operations and Google API for email integration.

PlaygroundPH (May - June 2025)

- Collaborated with multiplayer web games (Tic Tac Toe and Chain Reaction) using PHP, HTML, CSS, and JavaScript with WebSocket for real-time updates, SQL database for data management, and PHPMailer for email integration.

Python Software Development

October 2025 - November 2025

PCB Component Detector - Computer Vision

- Developed a PCB Component Detection system using Python and YOLOv8, trained on Kaggle image datasets via Google Colab, and built a computer vision model for automated PCB component recognition.

DevOps Simple Project

Feb 2026 - March 2026

CI/CD Automation with GitHub Actions

- Built a CI/CD pipeline using GitHub Actions with structured stages for code quality, testing (ESLint, TypeScript, Vitest), PR failure feedback, and automated deployment integration.

CI/CD with Docker Integration

- Developed a multi-stage Docker workflow using Node and Nginx with dependency separation, build optimization, layer caching, GHCR image versioning, and React SPA deployment support.

Mobile Application

October 2025 - Novemer 2025

VoyagePH - Flutter and Firebase

- Collaborated with the creation of VoyagePH, a plane ticket booking mobile application using Flutter and Firebase for real-time data management and user authentication.

On-Job-Training - BulSU Advanced Robotic and Intelligent Control Center June - August 2025

- Developed and tested pneumatic, electropneumatic, and PLC-based automation systems.
- Applied relay logic, electrical troubleshooting, and technical diagram interpretation in laboratory activities.
- Designed 3D models and operated Ender 3 and BCN3D printers for prototyping projects.
- Developed and contributed to a Laravel-based Inventory Management System utilizing XAMPP (MySQL) for backend database operations and Google API for email integration.
- Collaborated with a development team in designing, testing, and presenting a functional web application.

PhonoScan - Thesis (Role: Programmer, Hardware, Paper Writing) January - March 2026

- Developed PhonoScan, an AI-powered reading assistance tool for early elementary students.
- Built a real-time word recognition system with pronunciation, syllabication, phonemes, definitions, and voice output.
- Implemented wireless image streaming over Wi-Fi for real-time processing between hardware components.
- Applied Python, Computer Vision, Raspberry Pi, ESP32 (C++), and AI services to develop an interactive learning solution.

TECHNICAL SKILLS

- Embedded Systems & Electronics: Python, C++, Arduino, ESP32, Raspberry Pi, Sensor Integration, Hardware-Software Integration, Circuit Design, PCB Design & Layout, Electronic Troubleshooting, Soldering & Prototyping, EagleCad, KiCad.
- Software Development: Python, Java, C# Drag and Drop Visual Code
- Web Development: Laravel, PHP, XAMPP, ReactJS, CSS, Tailwind, HTML, JavaScript
- Automation & Control Systems: PLC Fundamentals, Ladder Logic
- Database & Data Management: SQL, MySQL, Database Design, Data Cleaning, Data Validation, Data Analysis, Data Management.
- Research & Technical Documentation: Research Methodology, Technical Writing, Documentation Preparation, Citation & Referencing, Thesis Development, Data Collection & Analysis.
- Leadership & Project Management: Team Leadership, Project Coordination, Task Delegation, Collaborative Development, Problem Solving, Decision Making, Time Management, Project Documentation, Agile Teamwork.
- Professional Tools & Technologies: Git/GitHub, Microsoft Office Suite, Visual Studio Code, Development Environments.

EDUCATION

Bachelor of Science in Computer Engineering

- Bulacan State University
- City of Malolos, Bulacan, Philippines
- Graduation Date: June, 2026

Senior High School - Science, Technology, Engineering and Mathematics

- College of Our Lady of Mercy of Pulilan Foundation Inc.
- Pulilan, Bulacan, Philippines
- Graduated: May 2022
